

# Zai Lab Announces Presentation of Results of the LUNAR Phase 3 Clinical Trial in Non-Small Cell Lung Cancer at 2023 American Society of Clinical Oncology (ASCO) Annual Meeting

## April 26, 2023

SHANGHAI and CAMBRIDGE, Mass., April 26, 2023 (GLOBE NEWSWIRE) -- Zai Lab Limited (Nasdaq: ZLAB; HKEX: 9688) today announced that the results of the LUNAR phase 3 clinical trial in metastatic, non-small cell lung cancer (NSCLC) will be presented for the first time at the 2023 American Society of Clinical Oncology (ASCO) Annual Meeting in Chicago, to be held from June 2 to June 6.

Our partner NovoCure Limited (Novocure) is conducting the phase 3, open-label, randomized LUNAR study evaluating the safety and efficacy of Tumor Treating Fields (TTFields) therapy together with standard therapies including immunotherapies for metastatic NSCLC following progression while on or after treatment with platinum-based therapy. We are participating in the China portion of this study.

"Novocure is pioneering an innovative therapeutic modality for the treatment of solid tumors with TTFields, and we are pleased to contribute and be a part of the LUNAR study," said Rafael Amado, M.D., President, Head of Global Oncology Research and Development, Zai Lab. "In China, lung cancer is the most common cancer type with approximately 700,000 new NSCLC cases diagnosed each year. We look forward to the presentation of the data at the 2023 ASCO Annual Meeting and are excited about the potential of TTFields to address significant unmet needs of lung cancer patients around the world."

Earlier this year, Novocure announced that the LUNAR clinical trial met its primary endpoint, demonstrating a statistically significant and clinically meaningful improvement in overall survival when TTFields therapy was added to standard pharmacological therapies compared to standard pharmacological therapies alone.

The LUNAR data will be presented on Tuesday, June 6 at 11:09 a.m. CDT in Hall D1 as a late-breaking abstract during ASCO's metastatic, non-small cell lung cancer session. The presentation will be given by lead author Ticiana Leal, M.D., of Emory University.

## Abstract Title:

• Tumor Treating Fields (TTFields; 150 kHz) with standard of care (SOC) systemic therapy in metastatic non-small cell lung cancer (mNSCLC) following platinum failure: Randomized, phase 3 LUNAR (EF-24) study.

#### About Zai Lab

Zai Lab Limited (NASDAQ: ZLAB; HKEX: 9688) is an innovative, research-based, commercial-stage biopharmaceutical company based in China and the United States. We are focused on discovering, developing, and commercializing innovative products that address medical conditions with significant unmet needs in the areas of oncology, autoimmune disorders, infectious diseases, and neuroscience. Our goal is to leverage our competencies and resources to positively impact human health in China and worldwide.

#### Zai Lab Forward-Looking Statements

This press release contains forward-looking statements about future expectations, plans, and prospects, including, without limitation, statements relating to Tumor Treating Fields, the LUNAR study, and the potential treatment of patients with non-small cell lung cancer. All statements, other than statements of historical fact, included in this press release are forward-looking statements, and can be identified by words such as "aim," "anticipate," "believe," "could," "estimate," "expect," "forecast," "goal," "intend," "may," "plan," "possible," "potential," "will," "would," and other similar expressions. Such statements constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not guarantees or assurances of future performance. Forward-looking statements are based on our expectations and assumptions as of the date of this press release and are subject to inherent uncertainties, risks, and changes in circumstances that may differ materially from those contemplated by the forward-looking statements. We may not actually achieve the plans, carry out the intentions, or meet the expectations or projections disclosed in our forward-looking statements, and you should not place undue reliance on these forward-looking statements. Actual results may differ materially from those indicated by forward-looking statements as a result of various important factors, including but not limited to (1) our ability to successfully commercialize and generate revenue from our approved products, (2) our ability to obtain funding for our operations and business initiatives, (3) the results of our clinical and pre-clinical development of our product candidates, (4) the content and timing of decisions made by the relevant regulatory authorities regarding regulatory approvals of our product candidates, (5) the effects of the novel coronavirus (COVID-19) pandemic, including any government actions or lockdown measures taken in response, on our business and general economic, regulatory, and political conditions, (6) risks related to doing business in China, and (7) other factors identified in our most recent annual and guarterly reports and in other reports we have filed with the U.S. Securities and Exchange Commission. We anticipate that subsequent events and developments will cause

our expectations and assumptions to change, and we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as may be required by law. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this press release.
